SUBJECT : Seattle Plant Groundwater Assessment Report

REFERENCE :

TO : J.H. Waldbeser A2SA

I am enclosing a copy of the groundwater assessment which Dames and Moore prepared for us and would appreciate your opinion on the adequacy of the survey and on the need for installation of a groundwater monitoring system at our plant. The comments in the margin of the report are mine. (We seem to have confused them about the differences between VBL, VBLS and VSB - understandable.)

I have also sent a copy of the report to Bob Ivory for EASC's evaluation and comments.

If you have any questions, please call Mel or myself.
